

### **NSMNMPF Secure Environment Setting Specialist Interest Group**

The NSMNMPF secure environment specialist interest group aims to provide a platform for peer support and discussion for prescribers (both qualified and currently in training) from within this setting. This will include topics on what is clinically effective within secure care & getting the balance right between healthcare and security.

You must be a member of the NSMNMPF to join (membership is free).

The group is open to NMP's (both qualified and currently in training) that work in any secure setting.

**If you are interested in joining this group please contact Rosie Mundt-Leach at [rosie.mundt-leach@slam.nhs.uk](mailto:rosie.mundt-leach@slam.nhs.uk) and she will pass on your details to the chair who will make contact with you and invite you formally into the group.**
